SUMMARY

Highly motivated MERN Stack Developer with hands-on experience building scalable full-stack applications using MongoDB, Express.js, React, and Node.js. Skilled in developing RESTful APIs, implementing secure authentication, and building responsive, performance-optimized UIs. Comfortable working in Agile environments, integrating third-party APIs, and solving real-world problems with clean, maintainable code. Strong debugging mindset and continuous learner focused on production-ready development..

SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, Authentication (JWT), MVC Architecture

Database: MongoDB, Mongoose, CRUD Operations, Schema Design

Tools & Workflow: Git & GitHub, Postman, VS Code, Redux Toolkit

PROJECTS

Chat-GPT clone | *React, Redux Toolkit, Node.js, Express, MongoDB, Gemini LLM, Pinecone, Socket.io* **July 2025 – August 2025**

- Built a full-stack AI chat application using React and Redux Toolkit on the frontend and Node.js, Express, and MongoDB on the backend, enabling real-time conversational AI experience.
- Integrated Google Gemini LLM for AI responses with prompt orchestration and context management to simulate ChatGPT-like interactions.
- Designed short-term and long-term memory system using Pinecone vector database for semantic retrieval.
- Implemented JWT-based authentication and secure API access for user sessions.
- Enabled real-time chat updates using Socket.io to improve responsiveness and user experience.

Payment Checkout System | *React, Node.js, Express, MongoDB, Razorpay*

December 2025

- Built a production-ready payment checkout system using React, Node.js, Express, MongoDB, and Razorpay with secure server-controlled order creation.
- Designed a secure payment flow where the backend acts as the single source of truth for pricing and order integrity.
- Integrated Razorpay webhooks to capture and verify payments, storing transaction metadata (order ID, payment ID, method, amount, timestamp).
- Developed a real-time payment status system using polling (/payment/status/:orderId) to handle success and failure states reliably.

CERTIFICATIONS

Full Stack Web Development – Project Based Training

Jan 2026

Sheryians Coding School

- Completed structured, project-based training covering frontend, backend, and real-world application development
- Built multiple hands-on projects using React, Node.js, Express, MongoDB, and modern tooling
- Focused on practical implementation, problem-solving, and production-style workflows

EDUCATION
